

TruIQ Global CBX4

4 IS Better Than 1

Product Training Level I

Why TruIQ 'CBX4'?

CBX4 possesses many features and benefits that separate it from single CBD products. Its unique "4x" formulation – 4 powerful cannabinoids instead of just 1 – and superlative efficacy make it one of the best Hemp Oil products on the market today.

Key Features:

- No artificial flavorings
- No preservatives
- No cheap carrier oils
- Pure Hemp Oil
- THC free
- 2018 Farm Bill Compliant
- Sustainable
- Traceable
- 100% guaranteed
- Ingestible & Topical

Key Benefits:

- Improved cognitive function (memory, learning, focus)
- Reduced stress and anxiety
- Improved weight management ("runners high" from exercise, reduced fatigue)
- Boosted immunity
- Reduced muscle, bone and nerve discomfort
- Improved sleep

IMPORTANT NOTE: because CBX4 does not contain THC (the psychotropic cannabinoid found in marijuana) it does not produce a "high" like THC, it is nonpsychotropic, nonpsychoactive, does not produce withdrawal symptoms and is not addictive.

Endocannabinoid System (ECS):

Biological system composed of receptors that bind to cannabinoids. The ECS acts like a 'lock & key' mechanism: receptors are the locks; cannabinoids are the keys. ECS receptors are 'unlocked' by cannabinoids.

Cannabinoids:

Natural chemical compounds that bind to cannabinoid receptors and act as neurotransmitters (nerve impulse conductors), activating them to influence their corresponding body system.

TrulQ meticulously resourced its 100% Pure Organic Hemp Oil to give the broadest cannabinoid profile possible, yielding the (4) most useful and valuable cannabinoids to human health:

- CBC (immune system, cell protection)
- CBD (aches and discomfort)
- CBG (considered the 'stem cell' of cannabinoids)
- CBN (sleep, appetite, anti-microbial)

Together, these four (4) cannabinoids produce a compounding effect, which creates a sum total of benefits exceeding those of the individual four (4) cannabinoids alone. Just one bottle of CBX4 has the equivalent value of 4 bottles in 1!

What can I take with CBX4?

CBX4 is formulated to be a complete safe formulation that meets all your cannabinoid needs. All nutritional products and even most prescription medications (check with your doctor just to be safe) can be taken with CBX4. It is a perfect complement to nearly any daily supplement regimen.
