# TrūIQ GLOBAL CBX4

## 4 really is better than 1!

CBX4's powerful "4x" formulation - 4 cannabinoids instead of just 1 - and superlative efficacy place it in a category all it's own.

### What is the Endocannabinoid System (ECS):

Biological system composed of receptors that bind to cannabinoids. The ECS acts like a 'lock & key' mechanism: receptors are the locks; cannabinoids are the keys. ECS receptors are 'unlocked' by cannabinoids.

### What are cannabinoids?

Natural Chemical compounds that bind to **ECS** receptors and act as neurotransmitters (nerve impulse conductors), activating them to influence their corresponding body systems.

### Which 4 cannabinoids do I need?

- CBC (immune system, cell protection)
- CBD (pain, sleep, neuroprotection)
- CBG (anxiety, mood, depression)
- CBN (skin, blood pressure, anti-viral)

"My mother lives with knee pain. After using CBX4 for just 1 week she feels a significant pain decrease. I feel CBX4 gives us 4 times greater benefits than any single CBD oil!"

-Kiko K.

"My patients often request CBD-type products, but I hadn't found one that actually worked for my patients. Then I found CBX4. After verifying its purity and efficacy, I tried it on my sprained ankle. Within 15 minutes the pain was gone. I was able to test for my black belt and I can now compete in my iron man. I love it when I find a product that works. Now my patients can benefit from it too."

-Dr. Milton C.

"As a Master Gardener and Herbalist, I believe the answers to most health issues can be found in nature. I'm happy to have finally found a whole hemp oil containing CBC, CBD, CBG & CBN grown in the USA, is legal, organic, safe, and is unlike most other CBD products that are synthesized, diluted, or imported. CBX4 works! It's helping my family, friends and me find relief for a variety of physical, mental and emotional issues. I highly recommend its daily use."

-Janie H.

### What can I take with CBX4?

CBX4 is formulated to be completely safe while meeting all your cannabinoid needs. Dietary supplements and most medications (check with your doctor first) can be safely taken with CBX4.

**IMPORTANT NOTE:** CBX4 does not contain THC (the psychotropic cannabinoid found in marijuana). It does not produce a "high" like THC, it is nonpsychotropic, nonpsychoactive, does not produce withdrawal symptoms and is not addictive.
